Project Ideas

projects focused on KIU

Mini Park

Introducing a mini park at KIU to promote socializing and relaxation. It enhances campus life by providing space for meetings, studying, and recreation.

Recycling Bins

Placing recycling bins in dorms at KIU promotes responsible waste management, sustainability, and student engagement in reducing environmental impact.

KIUchella

One-time event at KIU with live music, food, and drinks. A festive gathering for the university community to enjoy entertainment and socialize.

Water Dispensers

Stay hydrated at KIU with convenient water dispensers across campus. Enjoy chilled, filtered water.

Pharmacy

Introducing campus pharmacy at KIU for convenient healthcare access. Staff for medications and consultations.

Cost

Projects should be financially viable, considering initial investment and ongoing costs.

Community engagement

Communities ideas and thoughts will be considered during the project, the project is what community wants.

CRITERIA

Functionality

Each Project Should have its purpose, it should have main and useful usage, which will be beneficial for the community and intended customers

Health and Wellness Promotion

Project should promote healthy choices and lifestyle, disease prevention, and mental well-being, making it positive and better for people.

Checklist Model

Project	Criteria	High	Medium	Low
mini park	Cost. Community engagement. Functionality. Health and Wellness Promotion.	+ + +		+
recycling bins	Cost. Community engagement. Functionality. Health and Wellness Promotion.	+	+ + +	
<u>kiuchella</u>	Cost. Community engagement. Functionality. Health and Wellness Promotion.	+	+	+ +
water dispensers	Cost. Community engagement. Functionality. Health and Wellness Promotion.	+ +	+ +	
pharmacy	Cost. Community engagement. Functionality. Health and Wellness Promotion.	+ +	+	+

Mini Park

Cost is low, Because it is a construction and compared to other projects it is expensive

Community engagement is high, because according to our google forms kiu's community finds it the most appealing.

Functionality is high, because it has a clear purpose, which is for the students to be able to have fun outdoors and have a place to sit and relax, or exercise.

Health and wellness promotion is high, because the park encourages you to go outside more often, breathe fresh air, and move around and work out.

Recycling Bins

Cost is high, Because it is a one time inexpensive purchase.

Community engagement is medium, because according to our google forms kiu's community finds it not really appealing.

Functionality is medium, because it just helps you to sort out the trash, nothing more.

Health and wellness promotion is medium, because it promotes keeping the earth and your surroundings clean making it promote health and wellness, although it does not really promote self-improvement, and healthy lifestyle.

KIUchella

Cost is medium, Because it is a festival and compared to other projects it is not that expensive nor that cheap.

Community engagement is high, because a lot of people in kiu attend such parties.

Functionality is low, because it has only one purpose, which is to have fun and get to know their fellow students.

Health and wellness promotion is low, because it does not promote being healthy or having a healthy lifestyle at all.

Water Dispensers

Cost is medium, because dispensers need to be purchased. Good ones aren't cheap, moreover, water needs to be delivered or filled frequently.

Community engagement is medium, since drinking water is a problem for most students at KIU, they would attract some attention, But, still, they are just dispensers.

Functionality is high, because it's a necessity, everyone needs drinking water and most prefer to not drink tap water, hence, they would be useful for all living at KIU campus

Health and wellness promotion is high, since, water is a necessity for health. According to the research, 40% of Students worldwide are chronically dehydrated. The same applies to KIU.

Pharmacy

Opening a pharmacy includes expenses for designing and setting up the interior such as fixtures, shelving or any necessary equipment. Therefore the cost criteria is ranked low.

Many students are upset due to the absence of nearby access to medicine and essential items, particularly during emergencies. So community engagement is high.

Pharmacies are crucial for people and are frequently needed, so the functionality is high.

Health and wellness promotion is medium, because although it sells pills and products that help you be healthy, it does not necessarily promote healthy lifestyle.

Simplified Scoring Model

project	criteria	Importance weight	score	Weighted score
mini park	Cost. Community engagement. Functionality. Health and Wellness Promotion. Total score	1 3 2 2	1 3 3 3	1 9 6 6 22
recycling bins	Cost. Community engagement. Functionality. Health and Wellness Promotion. Total score	1 3 2 2	3 2 2 2	3 6 4 4 17
<u>kiuchella</u>	Cost. Community engagement. Functionality. Health and Wellness Promotion. Total score	1 3 2 2	2 3 1 1	2 9 2 2 15
water dispensers	Cost. Community engagement. Functionality. Health and Wellness Promotion. Total score	1 3 2 2	2 2 3 3	2 6 6 6 20
pharmacy	Cost. Community engagement. Functionality. Health and Wellness Promotion. Total score	1 3 2 2	1 3 3 2	1 9 6 4 20

Criterion	Importance weight
Cost.	1
Community engagement.	3
Functionality.	2
Health and Wellness Promotion.	2

Why weight the criteria the way we did

Recognizing that these projects prioritize environmental enhancement over profit generation, we have assigned the lowest weight to cost considerations. At the heart of our decision-making process lies community engagement, as we believe in valuing the voices and opinions of our students above all else. Additionally, we have assigned equal and moderate weights to functionality and health and wellness promotion, acknowledging their significance while maintaining balance with our primary focus on community involvement.

Thank You For Your Attention!
